

Ambu® Perfit® Collar

Key Benefits

- Ambu collars are fully disposable. You no longer have to worry about collars being returned to the source of origin and cross contamination issues are avoided
- Ambu collars come with a pre-shaped flip-chin piece to ensure they can be stored completely flat. Furthermore the flip-chin piece facilitates intubation and removal of vomit from a patient's mouth
- One-piece extrication collar simplifies application and at the same time there are no extra pieces that can get lost
- Tube hooks are located on the collar body to secure the oxygen tubes (except for Small Pediatric)
- All collars come with a ventilated posterior shell for fluid drainage and a large hole for easy airway access. All of these features allow for patient examinations to take place safely without removing the collar
- CT, MR and X-ray compatible*

Ambu® Perfit® Extrication Collars

The Ambu Perfit collars are designed to assist with the maintenance of neutral alignment, prevention of lateral sway and anterior-posterior flexion and extension of the spine during transport or movement.

* Distortion or shadows may appear on the image depending on the settings of the imaging equipment
